

## Advanced Trench Shoring - Pneumatic Set AT-PS1

151.004.161

### Designed to save weight and space on your truck

- One single system for all shoring operations
- Build any application with a system of only six different struts
- Construct lengths up to 17 ft / 5.2 m with only five different struts
- No fixed length extensions needed – Each strut also functions as an extension pipe

### Quick and easy setup

- Every strut can be connected to every other strut thanks to the patented Trident Coupler
- Each accessory fits on both ends of all the struts
- No accurate measurement needed – Two connected struts offer you twice the plunger stroke

### Maximum safety

- All strut combinations are allowed and safe – The patented Trident Coupler only allows you to connect two struts max
- Strongest struts in the market – Rigorously tested in multiple setups
- Holmatro developed OmniShore according to the criteria of testing used by FEMA's US&R Structures Sub Group to evaluate similar type shoring.

## Technical specifications

- Article number: 151.004.161
- Model: AT-PS1

### Set components:

- Strut M106x
- OmniLock Strut P200L4x
- OmniLock Strut P300L8x
- OmniLock Strut P400L8x
- OmniLock Strut P600L2x
- Swivel Base BPL1036x
- Shoring Hammer RS154x
