

Advanced Vehicle & Structural Shoring - Pneumatic / OmniLock Set AVS-POS1

151.004.158

Combined OmniShore & OmniLock set for vehicle stabilization, multiple structural shoring solutions and a small trench. With expansion sets also suitable for larger structural shoring solutions, lifting and high directionals. The patented OmniLock system allows you to automatically follow and lock a load in both directions.

OmniLock: Full control with less manpower

- No one needs to be near a moving load - Monitor and operate the OmniLock struts from a distance
- Auto-follow has your back - OmniLock automatically follows and locks a load in both directions
- Less people needed - Control multiple OmniLock struts simultaneously with the Wireless Controller

Designed to save weight and space on your truck

- One single system for all shoring operations
- Build any application with a system of only six different struts
- Construct lengths up to 17 ft / 5.2 m with only five different struts
- No fixed length extensions needed - Each strut also functions as an extension pipe

Quick and easy setup

- Every strut can be connected to every other strut thanks to the patented Trident Coupler
- Each accessory fits on both ends of all the struts
- No accurate measurement needed - Two connected struts offer you twice the plunger stroke
- Easy alignment of struts - The angle of OmniLock struts is shown on the Wireless Controller

Maximum safety

- Extend or retract an OmniLock strut remotely with instant stepless lock should the primary system fail
- All strut combinations are allowed and safe - The patented Trident Coupler only allows you to connect two struts max
- Strongest struts in the market - Rigorously tested in multiple setups
- Holmatro developed OmniShore according to the criteria of testing used by FEMA's US&R Structures Sub Group to evaluate similar type shoring.

Technical specifications

- Article number: 151.004.158

- Model: AVS-POS1

Set components:

- Strut M10: 2x
- Strut P40: 2x
- Strut P60: 2x
- OmniLock Strut P300L: 2x
- OmniLock Strut P400L: 2x
- OmniLock Strut P600L: 2x
- Raker Rail RR150: 6x
- Raker Rail Pin RRP01: 4x
- Clamp CLA90: 10x
- Pull Restrictor PRS90: 4x
- Swivel Base BPL10: 8x
- Swivel Base D-ring BPL11A: 4x
- Multi Head HPL140: 4x
- Chain Adapter HPL110: 2x
- Shoring Hammer RS15: 2x
- Ratchet Belt RBL80: 8x
- Chain CWH60: 1x
