

AWG wire guard basket DN 100

Kat. br. 212237

Collapsible protective wire mesh that protects the suction fire basket from the ingress of garbage, dirt and clogging. The suction basket is inserted into the protective net, which is fixed by means of a tensioner located on top of the net. After that, the net together with the basket is submerged in the place where it is necessary to pump out the water with suction fire hoses.
