

Barrier 2000x700 mm

1015061

Wooden Barrier used as an obstacle in Youth Firefighter competition.

The Barrier consists of a wooden board and a red metal frame with legs. The width of the Barrier is 200 cm and the height is 70 cm. Below the Barrier there must be a passage 15 cm high, for passing the fire hose "C" (52 mm).

The exercise with obstacles for youth firefighters is performed by nine (9) members of the competition squad of youth in the men's and women's category. The exercise with obstacles can be performed by 9 members of the competition squad of youth in mixed composition, but must be classified in the men's category. During the exercise, members of the competition squad are required to wear competition markings with numbers from 1 to 9. Mark 1 is on a white background, markings 2 to 5 on a red background and markings 6 to 9 on a yellow background.
