

Basic Trench Shoring - Pneumatic Set T-PS1

151.004.159

OmniShore set for small & medium trenches and basic spot shores. With expansion sets also suitable for T-trench, vehicle stabilization, lifting and high directionals.

Designed to save weight and space on your truck

- One single system for all shoring operations
- Build any application with a system of only six different struts
- Construct lengths up to 17 ft / 5.2 m with only five different struts
- No fixed length extensions needed - Each strut also functions as an extension pipe

Quick and easy setup

- Every strut can be connected to every other strut thanks to the patented Trident Coupler
- Each accessory fits on both ends of all the struts
- No accurate measurement needed - Two connected struts offer you twice the plunger stroke

Maximum safety

- All strut combinations are allowed and safe - The patented Trident Coupler only allows you to connect two struts max
- Strongest struts in the market - Rigorously tested in multiple setups
- Holmatro developed OmniShore according to the criteria of testing used by FEMA's US&R Structures Sub Group to evaluate similar type shoring

Technical specifications

- Article number: 151.004.159
- Model: T-PS1

Set components:

- Strut M10: 4x
- Strut P20: 2x
- Strut P30: 4x
- Strut P40: 4x
- Swivel Base BPL10: 18x
- Shoring Hammer RS15: 2x
