

Basic Vehicle & Structural Shoring - Pneumatic Set VS-PS1

151.004.155

OmniShore set for vehicle stabilization and basic spot shores. With expansion sets also suitable for lifting and high directionals.

Designed to save weight and space on your truck

- One single system for all shoring operations
- Build any application with a system of only six different struts
- Construct lengths up to 17 ft / 5.2 m with only five different struts
- No fixed length extensions needed - Each strut also functions as an extension pipe

Quick and easy setup

- Every strut can be connected to every other strut thanks to the patented Trident Coupler
- Each accessory fits on both ends of all the struts
- No accurate measurement needed - Two connected struts offer you twice the plunger stroke

Maximum safety

- All strut combinations are allowed and safe - The patented Trident Coupler only allows you to connect two struts max
- Strongest struts in the market - Rigorously tested in multiple setups
- Holmatro developed OmniShore according to the criteria of testing used by FEMA's US&R Structures Sub Group to evaluate similar type shoring

Technical specifications

- Article number: 151.004.155
- Model: VS-PS1

Set components:

- Strut M10: 2x
- Strut P30: 2x
- Strut P40: 2x
- Chain Adapter HPL110: 2x
- Multi Head HPL140: 2x
- Swivel Base BPL10: 2x
- Swivel Base D-ring BPL11A: 2x

- Chain CWH60: 1x
- Ratchet Belt RBL80: 3x
- Shoring Hammer RS15: 2x
