

Basket Stretcher

100222

Rescue Basket Stretcher are widely used in the field of rescue, whether it is rescue from the water or in the mountains. The stretchers are made of high quality non-combustible polyethylene that is resistant to external conditions. Due to its shape and material, it is suitable for safe use in almost all situations.

The interior of the stretcher is equipped with linings and protective belts that ensure comfort when transporting the injured person.

- Durable to adverse conditions.
- Suitable and practical for mountain's or sea rescues e.g. patient's elevation from the ship's store room or from narrow mountain's gorge.
- Ideal for quick and secure patient's transfer from inaccessible points, is being used for horizontal transfer and vertical elevation.
- Equipped with belts and adjustable foot support.
- With soft, non absorbable foam mattress which can be easily cleaned and disinfected.
- Made of HDPE and Aluminum pipes.
- Maximum load: 159 Kg.

Attention: The stretcher is not appropriate for patient transportation by helicopter.
