

Bolt Nozzle 52 mm Aluminum

1033358

Nozzles made of aluminum are used in firefighting or as part of equipment for installation in hydrant cabinets.

Aluminum fire nozzle 52 mm has a bolt that can combine full (centered) and spread jet, using a sprayer built into the central part of the nozzle. The nozzle is quickly and easily connected to a fire pressure hose 52 mm, using a Storz coupling which is also 52 mm in diameter.

Application:

- Firefighters
- Hydrant cabinet
- Agriculture
- Household

Technical specifications

- Connection: Storz fire coupling Ø 52 mm
- Body material: aluminum
- PVC coated handle
- Petrol-product resistant rubber
- Outlet diameter: Ø 12 mm
- Length: 410 mm
- Height: 135 mm
- Weight: 1.4 kg
- Standard: DIN 14365
