

Bolt Nozzle for hydrant cabinet

1033085

Nozzles made of plastic and aluminium materials are most commonly used to equip hydrant cabinets along with other related equipment, or for civilian use when irrigating agricultural land.

The nozzle has a bolt handle that can be used to combine a centered or spray jet, depending on the need of the user.

The nozzle connection (25-52 mm) fits all fire hoses with quick connection (storz coupling).

Technical specifications

Connection Ø	Lenght	Height	Weight	Nozzle Outlet Size Ø
25	295	100	0,80 kg	4-8
52	440	160	0,30 kg	9-12
