

## Decontbox Water Machine

100218

The device is designed for ensuring liquid flow (decontamination liquid or water) into decontamination circle nozzles and for decontaminated water suction. The pumping equipment consists of two pumps, a compression tank and a switchboard with a 230/24V power supply.

- diaphragm pump for distribution of decontamination liquid into nozzles
- diaphragm pump for contaminated water suction
- pump inlets are protected by filters
- GEKA couplings are used to connect the hoses
- dimensions: 570 x 405 x 610 mm (l x w x h)
- 2 barrels with capacity of 120 l (for decontamination liquid and waste)
- weight: 29 kg
