

Dönges Chimney cleaning tool set DIN 14800-SSWK

Kat.br. 217301

Chimney cleaning toolbox according to DIN 14800-4:2013-12 in Dönges Firebox made by Zarges with the inscription "Schornsteinwerkzeug".

Completely new concept with two-part tool set. In the box is a handy bag with shoulder strap for "cleaning upstairs". The remaining parts are for the "cleaning downstairs" and remain in the box.

Two spring steel rods are included in the set, but not shown. They don't fit in the box.

Regular use of a chimney cleaning tool set is recommended to prevent possible unwanted consequences and a chimney fire. Chimney cleaning prevents fires and carbon monoxide poisoning, and directly affects the life of the boiler or stove and their energy efficiency.
