

## Dönges firefighter axe FireAXEss

Kat. br. 211623

The FireAXEss was specially developed to use in fire brigades. The axe is equipped with a 3 kg hardened steel axe head and a robust fibreglass handle. Due to the special cutting edge geometry, the axe achieves a higher performance than a conventional wooden axe with the same amount of force.

The head also features a flattened side, which can be used as a sledgehammer or for driving in other tools. Special notches allow the quick combination of a hooligan tool with additional hook and loop straps for easy transport. A riser system is also available for this combination.

### Features:

- greater impact with less effort
- special cutting geometry
- robust handle made of durable fiberglass
- axe head with holder for a hooligan tool
- hardened steel for a long service life
- perfect in combination with the proven hooligan tools

### Technical specifications

- Dimension (L x W x H): 925 x 300 x 90 mm
- Material of axe handle: GFK
- Material of axe head: Stahl CF53
