

Dönges protective blanket set

Kat.br. 250000

This nine-part safety-blanket set is made of extremely strong materials to use in harsh conditions by fire and rescue services. Dönges protective blanket set can be used by firefighters and rescue teams, as protection against sharp edges and glass during rescue from traffic accidents.

The safety blankets consist of washable nylon fabric on the outside and extremely durable, tear-resistant nylon/polyester blended fabric on the inside. Dönges cover can also be used as a base for equipment and tools during technical interventions and exercises.

The emergency tarpaulins and the carrying bag are made of sturdy tarpaulin material which is also easy to wash. The protective covers are held in position by strong magnets and the holm protectors can be attached with hook and loop fasteners.
