

Door Opener HDR 50 ST

100136

Door opener designed for use on inward opening doors with multiple locking devices. Consists of a spreading cylinder to fix the door opener between the door posts and a pushing cylinder to push the door open.

Various accessories with quick-lock connection system are available for optimal grip on different types of door frames.

Low visibility:

- Quiet operation with hand pump
- High spreading and pushing forces
- Low ready for use weight

Adaptable to every door width:

- Spreading jack manually extendible in 4 positions over 200 mm
- Hydraulically extendible with another 125 mm
- Can also be used with extension piece of 275 mm

Quick installation and operation
