

Emergency Gloves for Rescuers Penelope Plus Green

2003241

A very popular model among rescue gloves. Comfortable handling, mouldability, tactility and TPR joint protection - these are the main features that play a primary role in the selection.

Description

Upper material:

- Back: Elastic textile.
- Palm: Goatskin leather with hydrophobic treatment.

Reinforcement:

- Leather reinforcement - protection of the back of the hand including fingers.
- TPR reinforcement - protection of the back of the fingers.
- Digital leather reinforcement on the fingertips.
- Elastic knitting - Kevlar® fiber PA with FR coating - reinforcement in between the thumb and the index finger overlapping the side seams - high cut and abrasion resistance, longer lifespan of the glove.

Lining:

- Palm: Knitted lining made of Kevlar® fiber/PES/fiberglass - high cut resistance.

Cuff:

- Elastic wristband made of neoprene with velcro fastening.

Other Information:

- High resistance to mechanical hazards.
- High strength.
- Breathability, sensitivity, flexibility.
- Close-fitting comfort fit.
- Terry fabric -absorbing sweat on the outside of the thumb.
- Plastic ring for hanging the gloves on a carabiner.
- EN 388 - cut resistance - class 5.

Standard:

- EN 388:2003

-
- 4 5 4 3

Size assortment:

- 6-7-8-9-10-11-12

Technical specifications

Care & Maintenance

Machine washing is now possible for both textile and leather Holík gloves.

- If disinfection is necessary for textile gloves, they can be washed at a maximum of 60°.

Procedure

- Remove coarse dirt after each use.
- Before washing, fasten the Velcro fasteners and remove the snaps.
- Use a liquid detergent. Wash on a short programme.
- To make the glove fit better: Shape the glove several times after washing and during drying.
- Do not dry in direct sunlight or heat sources, do not use a tumble dryer.
- Store the gloves in a dry environment.

Recommended use:

Washing Gel

- Washing gel is natural based for leather and textile gloves with high washing efficiency.
- It reduces bacteria, does not pollute the environment and is fully biodegradable.

Holík impregnation

- Highly effective impregnating spray for leather and textiles. The fluorocarbon based impregnation adds water repellency, oil repellency and anti-chafing to the face of the glove while leaving the product breathable.
- The impregnation is applied to the dry product in a thin layer and allowed to dry for a minimum of 12 hours.
