

Fire Hose Basket Carrier Donges

100352

The hose carrier basket according to DIN 14827 is part of the standard load for a large number of fire engines. Our hose baskets are made of aluminium and comply in all respects with the valid DIN 14827. One side can be opened for easy insertion of the hoses. Two Velcro straps close the flap securely and reliable.

With the help of a third Velcro strap, the coupling of the top hose is held on the basket. The hose carrier basket C offers space for three 15 m long C hoses and the hose carrier basket B for two 20 m long B hoses.

Weight of empty basket: 3.700 g

According to norm: DIN 14827
