

Fire Hose for Hydrant Cabinet 52 mm "Mreznica"

10092911

Fire hose for hydrant cabinet, diameter 52 mm, 15 meters long. Fire hose with thermoplastic elastomer (inner layer) and outer weave (rips or twill) 2/1. Manufactured according to standards:

- EN 14540
- HRN Z.C6.011
- EN 671-2

The hydrant cabinet hose is part of the standard equipment for hydrant cabinets of all types: wall hydrant cabinet, hydrant cabinet for underground hydrant and hydrant cabinet for overground hydrant. The standard hose length for the hydrant cabinet is 15 meters, and delivery in larger lengths is possible (according to the customer's order).

There are pressure Storz fire couplings with a diameter of 52 mm (2 ") at both ends of the hydrant cabinet hose. The Storz couplings easily connect the nozzle or other hose to the hydrant cabinet hose, with which we can reach an even greater distance when extinguishing a fire.

Hydrant cabinet hose is recommended exclusively for use in hydrant cabinets. For everyday use such as washing surfaces, irrigation, etc. contact us for better quality fire hose versions. If you are looking for more additional informations about equipment in hydrant cabinets, you are on right place! Read our article [Equipment for Hydrant Cabinet](#) and get all the informations and description you need about equipment for hydrant cabinets.

Technical specifications

Description	52 mm	75 mm
The outer, woven part	PES	
Inner layer	Thermoplastic elastomer	
Weight gr/met +/-15	175	235
Weaving (rips or twill)	2/2	2/1
Work pressure MPa	1,2	
Control pressure MPa	2,5	
Spray pressure MPa	4,5
