

Fire Light Pumper Magirus MLF

100303

The Magirus MLF light tank pumper with a gross vehicle weight up to 7.5 t offers maximum efficiency: This pumper (former StLF 10/6 fire engine) e.g. mounted on IVECO Daily chassis, is the perfect fire engine for fire-fighting missions, pumping water or technical assistance, although it's compact and light to pass all kind of obstacles - and can be driven by everyone. This vehicle type can be realized according to national standards and regulations of many countries.

Advantages & special features of the MLF

The Magirus MLF pumper is a compact and responsive fire engine with optimum suitability for narrow streets and historic innercity areas or constricted operation sites. This compact tank pumper offers high tactical value. The crew cab comes with enormous space provided for optimum task preparation, e.g. wearing breathing apparatus. The Magirus MLF is also available with all-wheel drive.

Technical specifications

Chassis:

- Vehicle mass Light (L): 3.0 > GVM ≤ 7.5 t (e.g. IVECO Daily or similar chassis from other manufacturers)
- Drivers crew compartment: Magirus Team Cab M Integrale 1+5
- Superstructure: Magirus AluFire3 technology
- Firefighting centrifugal pump capacity: Magirus FPN 10-1000
- Water tank: 1,000 l

Magirus Team Cab:

- Magirus Team Cab M Integrale
- Crew compartment connected to drivers cab and superstructure
- Entry and ceiling handrails in yellow
- Crew compartment flooring with anti-slip covering
- 2 Breathing apparatus in crew compartment
- 3-point seat belts (red) for all seats in crew compartment
- White LED interior lighting

Standard equipment:

- Compact and responsive fire engine, optimum suitability for narrow streets or inner-city areas, technically feasible under 3,000 mm total height
- Variable equipment storage system AluFire3 for optimal customisation to your individual requirements

- Optimal water tank set-up for balanced weight distribution
- Magirus HMI control panel for an easy and comprehensible operation
- Readily accessible pump for operation and maintenance
- Powerful MPN 10-1000 centrifugal pump
- Continuous ambient and interior lighting for consistent illumination
- Ergonomically optimized removal height for firefighting equipment
- Extensive loading capacity for firefighting and technical assistance
- Space reserves for individual additional firefighting equipment and personal gear
