

Fire Piston Module, 100 bar

100234

Features:

- High-quality components and replacement part availability.
- Great availability of spare parts.
- Resistant tanks made of stainless steel.
- The best quality/price ratio.
- 2-year warranty.

Water tank:

- Large capacity tanks to choose between several configurations. From 400-600 Liter water storage
- 2 inner breakwaters to prevent water movement to ensure vehicle stability.

Attack winder, Attack nozzle and Absorption oversleeve:

- 70 meter rubber hose up to 80 bar. The winder comes assembled with a connection to the water pump.
- High-pressure and high-range nozzle (700 mm.). Variable angle with Ø 4,5 nozzle tip. 1/2" M inlet connection.
- 5 meter translucent white, blue or yellow spiral absorption oversleeve.

Foam System (optional):

- A compact, easy-to-use system to mix foaming agent with 0 to 6% manually controlled high-pressure adjustment using a control panel.
