

Firefighter Boots Brandbull 005 PL

1010346

Fire intervention boots for structural fires. The upper of the boots is made of black leather. Boots that have a multi-layer textile lining, a removable multi-layer leather insole and a black rubber (NBR) sole.

Simple and quick placement of the boots on the feet is enabled by (red non-combustible thread) sewn leather straps on both sides of the boot. The red edge on the top of the boot and on the back completes the design of this model. This fire boots offer an excellent price-quality ratio for firefighters, civil protection...
