

## Firefighter Boots Brandbull Dejan II

1010339

For every firefighter, his equipment is essential to protect him in the performance of his duties. Firefighting interventions present many life and health hazards.

One of the important protections is the protection of the legs. For this reason, it is important that your feet are protected by quality footwear that is certified in accordance with the standard for fire safety footwear. "Brandbull" firefighter boots meet all requirements and have passed all necessary tests and contribute to the firefighter's safety with their protective properties. Many Volunteer firefighter departments, whose firefighters use "Brandbull" footwear, are proof of this.

### Characteristics:

- Design (type): low boot
- Footwear type: footwear for firefighting interventions in wildland / forest fire
- Protection symbols: F2A - all normative requirements for type 2 and antistatic properties, HI3 - heat insulation level 3, SRA - slip resistance type A
