

Firefighter Boots Kommandant Pro

1010573

The Kommandant boots are the ideal companion for firefighters who have transformed their passion into a profession. Designed especially for professional use the Kommandant boots leave nothing to be desired.

The combination of an extremely easy entry and a stability at the ankle, which comes very close to that of a classic laced boot is remarkable: thanks to this fast entry, the Kommandant Pro was considered to best boot for the french airport firefighters in Lyon and asserted itself over well know competitors.

Technical specifications

- black full grain waterproof leather, thickness 2.4-2.6 mm, bootleg construction without side seams, heat resistant thread (Nomex), reflective side panels and backstrap
- steel toe cap impact resistant to 200 joules, abrasion resistant scuff cap, with twin recessed seams, stainless steel midsole
- anatomical, removable cork insoles, reinforced heel stiffener
- rubber/PU self-cleaning sole (injection moulded) with lateral profile, abrasion, fuel, oil and acid resistant, non-marking sole
