

Firefighter Boots Leutnant Pro

1010572

Our Leutnant pull-on-boots are perfect for firefighters who are at the beginning of a volunteer firefighter career. With a small budget you get a boot that makes no compromise in terms of security.

With the Leutnant, you benefit from the typical VÖLKL injection moulded soles for a better damping, insulation and a lighter product. Furthermore our Leutnant boots meet the HI3 standard and are ideal for inside attacks. The only model from a lower price category, but just like the rest of our firefighting boots it is made out of high quality smooth leather.

Technical specifications

- injection moulded rubber/PU sole with excellent energy absorption and heat insulation properties: temperature, inside the shoe increases by only +2.3 °C, proportion of PU above 90%
