

Firefighter gloves Crystal Long

Kat. br. 8110-04

The gloves with sophisticated reinforcement system for better mechanical and thermal resistance. In addition, the nomex fabric is ceramic coated in exposed areas for increased abrasion resistance.

The Crystal Long Fire Fighting Gloves are designed to provide you with superior comfort and heat protection at the same time when fighting structural fires in buildings.

During firefighting interventions, hands are exposed to greater danger and possibility of injury compared to other parts of the body. Wearing the right gloves plays a crucial role for firefighters and other rescue services. Give your hands the ultimate protection they need during firefighting, firefighting or search and rescue. These gloves offer not only protection, but also a comfortable anatomical fit.
