Firefighter Suit Texport Fire Survivor X-TREME® light, Nomex® NXT, function Bear

1010

Protective suits for Firefighters of the world-renowned manufacturer of fire protection clothing and footwear. The suit is certified in accordance with fire safety standards. When designing and manufacturing each suit, care was taken to ensure that the suit was functional and met all firefighter needs.

Full attention was paid to the protection of the wearer himself and his smooth work in the suit. The materials used to make each Texport® suit have undergone rigorous testing to meet all the standards that are relevant to the production of a firefighter protective suit. The design of each Texport® suit is a separate story and a special care was taken for every detail such as: pockets, reflective straps, Velcro straps, zipper ...

Check out why many volunteer firefighting departments and professional firefighting units in Croatia and across the world use Texport® fire fighting suits and become one of the most satisfied users, because to save someone's life you have to secure yours.
