

Firefighter Work Suit Ignis

1010727

A fire fighting work suit is an integral part of working firefighters clothes and is worn by firefighters at fire fighting competitions or while performing daily tasks in a unit or fire department.

The Ignis firefighter work suit is an improved model that is primarily designed to make it easier for the user to work on multiple jobs and provide superior comfort. The suit is dark blue, with sewn-on silver stripes that allow better visibility of the user in conditions of reduced visibility.

Jacket - firefighting work suit:

- Color: dark blue
- Reflective elements, horizontal and vertical for better visibility
- Fastening: zipper
- Pockets: two sewn-in pockets at chest height, with zipper and two classic side pockets
- Above the chest pockets are sewn Velcro strips for duties / surnames
- Brackets for epaulettes are sewn on the shoulders
- Stretch areas on the back of the shoulder: for complete freedom of work and movement, and better breathability
- The lower part of the jacket with velcro side straps, which allow the jacket to be tightened and adjusted to the user
- A velcro strap on the sleeves at the height of the wrist, that allows the sleeves to be tightened and adjusted

Pants - firefighting work suit:

- Color: dark blue
- Fastening: zipper with button on the top
- Waist straps for firefighter work belt
- Pockets: two pockets at the hips and two rectangular side pockets on the pants legs
- The pockets on the legs are foldable and fasten with velcro
- On the back of the pants are two more rectangular pockets with flaps and Velcro fastening
- Reflective elements on the underside of the trousers
