

## Firefighter Work Suit

1010004

The fire fighting work suit is an integral part of the work clothes for firefighters and is worn at firefighting competitions, during the performance of work tasks in the unit or the fire brigade outside the intervention, and also for firefighting assemblies.

A firefighter work suit consists of a jacket and pants. In our offer you can find a working fire fighting suit for young firefighters or adults.

### Firefighter Work Jacket:

- Made of dark blue fabric with a raw material composition of 50% combed cotton and 50% polyester
- Fastens with zipper and flap with metallic dark blue buckles
- On the front of the blouse at chest height, are sewn two pockets with flap fasteners
- Below the upper elbow-high pockets are two obliquely incised pockets
- Shoulder strap holders with the title mark are sewn on the shoulders, and they are fastened with a dark blue button
- The sleeves are made of two parts, and at the ends they end with cuffs that fasten with buckles
- The back of the blouse is made of one piece, and on each side there are edges facing the sleeve
- The blouse has a belt that buckles with a buckle, and the inside is lined with synthetic lining
- Professional bracelets worn on the blouse are made of dark blue fabric
- A 5 cm sleeve from the top edge is sewn with a fire brigade or company insignia

### Firefighter Work Pants:

- Made of dark blue fabric with a raw material composition of 50% combed cotton and 50% polyester
- They have one notched pocket on the top left and right
- On the left and right at the height of the thigh are sewn two accordion pockets with flap fasteners
- The width of the socks at the lower end is from 22 cm to 26 cm
- The required number of belt holders, 4-6 cm wide, is sewn on the trousers around the waist

### Additional work clothes:

- Firefighter work shirt (blue)
- Cap with emblem
- Work Shoes
- Duty Emblem
- Firefighting Rankings and Duties
