

First Aid Cabinet

3003063

Metal wall cabinet, with lock and compartments for first aid kit. The cabinet is delivered empty, with two keys and can be easily mounted on the wall. At the back there are holes on which the cabinet is placed on the wall.

The door has a logo in the form of a red cross, and locks that allow access only to authorized persons with a key. The First Aid cabinet with the first aid kit is always placed in a visible and easily accessible place. Places where we can find a first aid cabinet: warehouse, workshops, kitchen ... It is very important that an authorized person by the employer performs a periodic inspection of the cabinet and controls the contents and expiration dates for certain products (fish oil).
