

## Glas-Master, extrication tool for vehicle glass removal

1021431

Glas-Master is a revolutionary new manually operated, self-supported (no electricity or hydraulics necessary) glass removal tool that gives rescuers extra time to save lives during the "golden hour." The Glas-Master is a revolutionary tool that has been developed to expedite the removal of all vehicular glass, reduce the risk of trauma to the patient, and provide increased rescuer confidence in safely tackling this task.

- Fast - No other manual tool cuts glass faster
- Effective - Cuts rescue time significantly
- Versatile - Use on fiberglass, wood, plaster, etc. Used for underwater rescue
- Safe - Less danger to entrapped victims and user

The storage of the spring loaded center punch in the Glas-Master has also proven to be an advantage. In the past, the window punch was frequently lost or misplaced and not immediately available when needed. Keeping the window punch in the Glas-Master has reduced tool loss and reduced the "seek and find" time.

Now with a new blade design that reduces the windshield glass fragmentation by 33% over the conventional blade. This new blade will cut smoother and with less effort than before.

The set consists of:

- PVC case with special compartments for neat stacking of tools
- Glas - Master with special serrated blade: 1 pc.
- Glas - Master glass puncher
- Glas - Master rescue knife PRT II: 1 pc
- Windscreen Removal Tool (fork)
- Safety goggles: 1 pc.
- Face mask, for protection against dust: 3 pcs.
- Adhesive tape reel: 1 pc.
- Suitcase dimensions: 480 x 460 x 140 mm
