

Glas-Master Rescue knife PRT-II, Glassmaster

KAT: 212402

PRT pocket rescue knives have been designed for users who wish to carry a small, lightweight rescue knife but do not wish to lose any functionality.

The large thumb opener and the large release button allow the equipment to be used whilst wearing thick gloves. The hafts are made from anodized aluminum, blade, internal mechanism and stainless steel belt clip. The materials, the many years of experience of the manufacturer and state-of-the-art manufacturing methods ensure that the rescue knives have consistent, high quality and a long service life.

Main characteristics:

- one-handed operation (also with gloves)
- stainless, lockable blade
- super-sharp 1/2 serrated edge
- stable belt clip
- safety belt cutter
- window breaker
- extremely durable aluminum handle
- made in Solingen

Dimensions and weight:

- length: 20.6 cm (open), 12.2 cm (closed)
- weight: 130 g
