

Gloves for forest firefighting and rescuers Foresta

2003291

Foresta gloves for forest firefighting are exceptional for their high breathability, tactility and protective properties.

Description

Upper material:

- **Back:** effiSHELL, material composition developed by Holik
- **Palm:** Washable and thermo-stable goatskin

Lining:

- **Back:** Additional layer added for greater thermal protection
- **Palm:** Kevlar®/PES/Fibreglass lining providing protection to mechanical risks

Reinforcement:

- **Back:** In the area of cuff - FR microfiber
- **Palm:** Goatskin in the knuckle area

Other informations:

- Extremely comfortable and high dexterity gloves
- Gloves are designed in a way that seams do not intrude and the glove can be worn all day
- Water repellent, heat resistant and highly breathable
- A pull loop on the palm for easier donning of the glove, which at the same time serves for hanging the glove
- The material is extremely flexible, it adapts perfectly to any hand
- Thanks to the top FR layer, the material is suitable for firefighter's gloves
- The reverse side is made of cotton which ensures maximum comfort and does not irritate the skin and ensures that the gloves can be easily donned and doffed, even when wet
- The glove dries quickly when turned inside out

Standards:

- Mechanical resistance according to EN:388 - 3443C
- Heat resistance according to EN 407 - 4121
