

## Helmet Holder Solo Rescue

2005470-5

With the Helmet Holder you can wash and decontaminate up to three helmets at a time or up to 21 helmets an hour.

It has a special design that not only secures the helmets in place during the wash cycle, it also positions the helmets in a way that maximizes the decontamination result by making sure the water jets of the Solo Rescue Decon Washer reaches all parts of the helmets – inside and outside.
