

High-pressure Compressor Mariner 200

100118

- **Tough:** Thanks to an incredibly durable driving gear. Suitable for short-term operation and continuous service.
- **Durable and robust:** Three-stage or four-stage construction and industrial roller bearings maximise the service life of the units.
- **Protected against corrosion:** With an ultra-lightweight aluminium chassis for the best possible protection against corrosion.
- **Reliable lubrication:** With generously dimensioned low-pressure oil pump.
- With charging rate of 200 l/min, the MARINER 200 is the versatile mobile compressor unit in the PROFI-LINE II series which impresses with its range of equipment: the corrosion-resistant crash frame to which system accessories can be attached is integrated as a standard feature.
- Furthermore, the first stage and the high-pressure final stage of the MARINER 200 feature piston rings made from a new high-tech plastic which are virtually wear-free.
- The vibration-reducing motor rocker design optimises smooth running.
- Thanks to the extensive range of BAUER accessories, the compressor can be customised to meet all manner of different requirements and intended uses in next to no time.
- Suitable for use as a diving compressor, shipping compressor, for installation in yachts, as a fire service compressor, paintball compressor and in many other applications. Petrol and electric versions available.

Technical specifications

MARINER 200 compressor, 90 – 330 bar, 200 l/min, high-pressure compressor for compressing air and breathing air

Type designation	Charging rate ¹	Drive		Filter system	Net weight	Dimensions L x W x H
	l/min	Motor	kW		approx. kg	cm
MARINER 200-B	200	Petrol engine	5.9	P 21	115	130×62×63
MARINER 200-E	200	Three-phase motor, 400 V, 50 Hz ²	4.0	P 21	115	130×60×63

¹ Measured with cylinder filling from 0 to 200 bar, ±5%

² Option of different voltage/frequency available
