

High-pressure Compressor PE-VE

100123

- The proven PE-VE series: For peak free air delivery up to 850 l/min
- Ideal for transport and breathing protection: Practically equipped and absolutely reliable in operation
- Compressor with BAUER quality standard: Technically advanced mirroring the state of the art

The breathing air compressors in the PE-VE series are characterised by their impressive peak free air delivery rates of up to 850 l/min.

Professionally customised to meet individual needs and FAD requirements in breathing air applications, the PE-VE units offer practical equipment, typical BAUER quality and certified safety for reliable stationary operation.

Technical specifications

Type designation	Charging rate ¹			Number of compressor stages	Speed approx.	Motor output	Dimensions L x W x H ²
	l/min	m ³ /h	cfm				
PE 300-VE	300	18	11	3	1800	7.5	114×83×152
