Hose Clamp 122 - 130 mm

3008431

Clamp for attaching couplings to suction hoses with a diameter of 110 mm (4").

We use hose clamps when we want to attach suction couplings to solid suction hoses, such as PVC hoses. By loosening the screw, the body of the clamp is stretched and after it is placed on the hose, by tightening the screw, the clamp tightens and fastens the hose to the suction coupling.

Technical specifications

- Material: Steel
- Protection: galvanized
- Diameter: 122 - 130 mm (hose diameter 110 mm)
