

Hose Clamp 55 - 60 mm

3008672

Clamp for attaching couplings to suction hoses with a diameter of 52 mm (2").

We use hose clamps when we want to attach suction couplings or suction aluminium strainers to solid suction hoses, such as PVC hoses. By loosening the screw, the body of the clamp is stretched and after it is placed on the hose, by tightening the screw, the clamp tightens and fastens the hose to the suction coupling or strainer.

Technical specifications

- Material: Steel
- Protection: galvanized
- Diameter: 55 - 60 mm (hose diameter 52 mm)
