

## Hytran PowerFoam

100480

The PowerFoam is a sophisticated system that provides a very accurate foam dosage over the full range of water/foam mixture and water/foam quantity. This accurate foam dosage makes it possible to optimize the foam rate to a less expensive value.

This unit is available as a stand-alone system (with own diesel engine) or as a built in system on the AutoBoost units or HydroSub® units with boost pump (HS550 and above).

### Capacity:

- 6% up to 24.000 lit/min.
- 3% up to 48.000 lit/min.
