

## **Intrinsically Safe Rechargeable LED Scene Light Kit, Nightstick XPR-5590RCX**

100057

The XPR-5590RCX Intrinsically Safe Rechargeable LED Area Light kit with a 6-foot tripod is perfect when safety and portability are most important. cETLus certified Intrinsically Safe for use in hazardous environments, the array of 36 floodlight LEDs perfectly emit a full 1,100 lumens on high for 4 hours, or 500 lumens on low for 4 hours when activated using its robust three-position toggle switch. The included tripod featuring a stable base and a pair of cam-lock extension adjusters provide height-adjustable lighting where needed.

The housing is constructed from lightweight 6061-T6 aluminum and the multi-fin heat sink design keeps the fixture cool to the touch. The light can be swiveled independently allowing the user to position the fixture exactly wherever light is needed and the heavy-duty magnetic base allows the light to be attached to most metal surfaces for hands-free operation. The area light kit includes light with an adjustable handle and magnetic base, six-foot tripod, AC and DC power supplies with a blow-molded carrying case.
