

Jacket fleece Windstopper - Civil Protection

2001903

Windstopper fleece jacket - Civil Protection is intended primarily for civil protection units. It can also be used on its own as a fire jacket or under jacket under an intervention, or work fire suit.

The simple combination of Windstopper and Softshell materials makes this jacket comfortable and suitable for a variety of applications. Zippered jacket, two large functional pockets in the middle of the chest with a folding system. Two lower side pockets with zip fastening system. Above the chest pockets are sewn two velcro strips to place the surname/duty emblem.

On the left sleeve there is a velcro that offers the possibility of placing the emblem of the fire brigade or civil protection. The extra look of the jacket is enhanced by a thin orange line that extends the entire width of the chest at the front and the entire width at the back. Stitched rubber at the width of the sleeves and adjustable width with Velcro. Width adjustment on the length of the jacket, with elastic rubber and stoppers.

Application:

- Firefighters
- Civil protection
- Work protective clothing
- Free time
- Catalog number: V9949025001
