

## Jacket fleece Windstoper Professional

2001689

It can be used as a fire jacket or a jacket for civil protection. Windproof, made of fleece material. It can be worn on its own as a jacket during warmer weather or in case of rain and colder as a jacket under a waterproof jacket, emergency or work firefighting suit.

The Windstoper Professional fleece jacket offers quality wind protection and at the same time provides comfort and warmth. There are two horizontal pockets on the chest that close with a zipper. There are two additional pockets on the sides with red details on the outer edges.

The upper chest pockets are accompanied by a sewn-on thin red line, which further enhances the look of the jacket. The same line extends to the back of the jacket from the left to the right sleeve. Fastening system: zipper.

Application:

- Firefighters
- Civil protection
- Work protective clothing
- Free time
