

Kelmaplast Barrier tape 500 m

Kat. br. 212814

Barrier tape is used during works on streets and roads. It is intended for marking the workspace and protection against unwanted access (psychological barrier).

It is intended for marking the area during fire exercises or interventions. The marking tape can be used by utilities and construction companies during the laying of pipes and cables in urban or rural areas and for all other purposes.

Quality polyethylene barrier tape, highly tear-resistant. Light-fast printed on both sides with vertical stripes. All barrier tapes are 80 mm wide, available in rolls of 100 or 500 metres in length.
