

LED Area Light Donges 100 W, 10,000 lm

1027034

Donges LED area lights offer the latest lighting technology at an unbeatable price. The LED bulb has a long life time and is insensitive to vibrations.

LED area lights can also be easily operated on small power units. The large beam angle of about 150° allows good and wide illumination of the area with a very good color display. Thanks to a suitable cooler, the reflectors heat up very little during long periods of use, which has a positive effect on the emission of LED light. After switching off, the reflectors can be switched on again without cooling. It is designed in such a way that it can be attached to all universal reflector stands.

Description:

- High quality housing with powerful cooler
- Hand lever to lock tilt angle
- 10 m connection cable with IP68 waterproof jack

Technical specifications

- Protection standard: IP65
- Illumination: LED
- Voltage: 230 V.
- Power: 100 W.
- Light intensity: 10,000 lm
- Dimensions W x H x D: 400 x 380 x 130 mm
- Weight: 6,600 g
- Light color: 6,500 K.
- Energy efficiency: A
- Beam angle: 150°
- Power cable: 10 m
