

## Mobile Radio Station Motorola DM4600e

100300

The DM4600e is a digital mobile two way radio from Motorola. Available for both UHF and VHF frequencies, the DM4600e has a channel capacity of 99 allowing for ample communications between a team. IP54 protection means that the radio has a limited Ingres protection against dust, whilst also being safeguarded against splashes of water. The DM4600e comes as standard with a 25w power output, but for an additional cost this can be upped to 40-45w.

Available to be mounted on the dashboard of a vehicle, this can be done via the purchase of a mounting kit as seen in the drop-down menus to the right. The front of the radio is made up of an alphanumeric display alongside 4 programmable buttons allowing for customization to the users needs, also having rugged front and rear accessory connectors present.

Multi-coloured LED indicators give the operator clear feedback on the operating status of the radio, whilst a 3 watt built-in front mounted loudspeaker is present for concise and clear audio. The DM4600e is also built to military standards (MIL-STD-810 C/D/E/F/G) meaning that it is rugged and reliable, tested in a variety of working conditions to ensure its reliability in a variety of work places.

The Motorola DM4600e is an ETSI DMR Standards compliant digital radio that offers crystal clear digital audio and data compatible communications.

### Key Features:
