

Nozzle for Medium Expansion Foam 2"

1033449

Medium expansion foam nozzle is a specially designed nozzle for generating foam, using water and foam.

Characteristics:

- The nozzle quickly and easily connects to the hose via a Storz coupling
- The gun-shaped design allows the user to use it lightly
- It contains a separate foam container that separates from the nozzle
- The nozzle is designed to extinguish fires on the ground, indoors and outdoors
