

Nozzle for Medium Expansion Foam 2", with valve

100086

Medium foam nozzles are special types of nozzles, where the foam is generated in a ratio of approximately 1:75. Due to the low weight of the foam, the range is reduced to approximately 12m from the user's position, depending on weather conditions.

These nozzles are suitable for indoor and outdoor applications, depending on the type of fire being extinguished. Also, the nozzles are equipped with a flow control latch and pressure gauge to optimize foam consumption with respect to quenching needs.

Technical specifications

Size	Connection	Flow l/min	Length	Width	Height	Weight
M-2	C - 52	200	545 mm	250 mm	205 mm	4,3 kg
M-4	C - 52	400	630 mm	305 mm	270 mm	5,5 kg
M-8	B - 75	800	800 mm	340 mm	355 mm	6,5 kg
