

## Nozzle TURBOMATIC 25 mm

1033548

Turbomatic nozzles have the possibility of full and sprayed jet. The type of jet is adjusted by means of a rotating head. The valve ball built into the mechanism allows a quick start and switching of the jet type.

### Technical characteristics:

- Operating pressure min. - 6 bar
- Application: medium and high pressure\* (10 - 40 bar)
- Flow 40 - 180l / min.
- Weight: approx. 1,5 kg

\* To use the nozzle at high pressure, it is recommended to order a nozzle with a brass coupling.
