

Nozzle TURBOMATIC 52 mm

1033211

The TURBOMATIC nozzle is used for fire extinguishing with a full or spray jet, with an additional attachment for foam. The special feature of this nozzle is contained in the rotary nozzle extension of the nozzle, which generates a highly effective water mist.

Also, there is a possibility of regulating the flow rate at 100-400 l / min, according to the user's request. When a foam attachment is used then the flow is stabilized at 200 l / min.

Construction material:

- Aluminum cast alloy
- Aluminum forged alloy
- Copper alloy
- Plastic Novilon
- Oil-resistant seal

Technical specifications

Name	Connection	Lenght	Height	Weight
Turbomatic	C - 52	285 mm	250 mm	2.5 kg
Foam extension	C - 52	371 mm	-	0.6 kg
