

## Opel Vivaro Combi Fire Vehicle

101010

Fire van vehicles are used to transport a large number of firefighters to interventions, fire competition teams to competitions or to fire assemblies and anniversaries.

For the Voluntary Fire Brigade Gradec (Zagreb County), we delivered the model "Opel Vivaro Combi", 1.6 CDTi (2018). This van model can transport up to 9 passengers (8 + 1). The vehicle is in the original silver color and for firefighting use it is completely covered with red foil. The vehicle is additionally affixed with reflective stickers, which raises the appearance of the vehicle, but also increases visibility in conditions of reduced visibility. Emblems of the fire brigade are affixed to the driver's and front passenger's doors.

The vehicle is also equipped with the necessary light and sound signaling which includes a roof LED light bar and flashes of the latest generation, which are installed in the front grille of the vehicle. The side and rear windows are additionally tinted and provide passengers with sun protection. The vehicle is equipped with air conditioning, car radio with CD and other details that make traveling in this vehicle more comfortable.

Read about the delivery of this vehicle for VFD Gradec and contact us if you are interested in this or a vehicle with similar specifications. For all additional questions, our sale advisers are at your disposal.
