

Petrol Driven Fan MT245 - 52,320 m³/h

MT245

MT245 is the lightest fan in its class. Measuring the same size as the MT296, it weighs only 52 kg. It is mainly used for the ventilation of houses, small buildings and medium-size industrial units.

EASY POW'AIR technology

The speed and concentrated shape of the EASY POW'AIR jet entrains surrounding air, thereby increasing the fan's flow rate. The force and stability of the jet gives constant and optimal efficiency from 2 to 6 m between fan and opening. This creates valuable space for intervention teams working in/around the entrance. In addition, fans with this technology are equipped with automatic tilt.

The lightest of its category

Equipped with a HONDA GX200 engine, MT245 petrol-driven fan is the lightest in its class.

A wide range of options available

MT245 petrol-driven fan has a wide range of options available: Spiral duct, mister, exhaust extension, protective cover and -10° prop that allows negative tilt for basement ventilation. This fan can also be equipped with a high expansion foam adapter.

Technical specifications

- Open air flow: 52,320 m³/h
- Weight: 52 kg
- Dimensions W x H x D: 710 x 720 x 617 mm
- Propeller diameter: 570 mm
- Autonomy: 2 h at full speed
- Engine: HONDA GX 200 engine (4-stroke). Automatic engine stop system in case of lack of oil. Assembly inspected and approved by Honda Motor Co., Ltd.
- Engine power: 5.5 HP according to SAEJ1349 standard of 2007
- Noise level: 96 dB at 3m
- Ventilation type: PPV blowing
- Application: Single door (houses, small buildings, etc.) and double door (very tall buildings, medium-size industrial units, etc.)
