

## Protective Firefighter Boots Black Fighter

1010914

Firefighting boots for structural fire. Superior protection for your legs during firefighting or technical interventions. The main advantages of the Black Fighter intervention boots are adhesion, stability of your legs and movement control, and durability.

They are designed for progressive grip on any terrain and reliable control in all directions. The sole has wide grooves that allow easier removal of liquid and debris at the fire site. The recess on the sole helps with movement and absorbs bumps, and the massive relief parts serve for durability and stability of the movement of your feet.
